

Technical overview

JURA standards

Variable brewing unit, from 5 g to 16 g	■
Intelligent Pre-Brew Aroma System (I.P.B.A.S.©)	■
Additional pre-ground coffee powder	■
Hot water function	■
Cappuccino frothier	■
Height-adjustable coffee spout	■
Multi-level conical grinder	■
CLARIS filter cartridge	■
High-performance pump	15 bar
Thermoblock heating system	■
Integrated rinsing, cleaning and descaling programme	■
Adjustable water hardness	■
Zero-Energy Switch	■
Swiss made	■

Specific benefits

Automatic recognition 2nd coffee variety	■
Energy Save Mode E.S.M.®	■
TÜV certificate for user-friendly user manual	■

Settings and programming options

Programmable amount of water	■
Amount of water can be adjusted for each preparation	■
Programmable coffee strength	3 levels
Coffee strength can be adjusted for each preparation	■
Programmable brewing temperature	2 levels
Clear text display	■
Rotary Switch	■
Programmable switch-off time	■
Monitored drip tray	■

Design and materials

Height-adjustable coffee spout	65 – 111 mm
Connector System®	■

Accessories

Professional Cappuccino Frothier	optional
Cup warmer	optional
Cool Control	optional

In Figures

Water tank capacity	1.1 L
Coffee grounds container (servings)	approx. 10
Bean container with aroma cover	125 g
Cable length	1.1 m
Voltage	230 V~, 50/60 Hz
Power	1,450 W
Energy consumption	13.5 Wh
Energy consumption with E.S.M.®	approx. 8 Wh
Stand-by power	ZERO W
Weight	9.3 kg
Dimensions (W x H x D)	23.8 x 36 x 44.5 cm
Colors	black, white

ena³ - THE SMARTER CHOICE

ENA
THE SMART CHOICE

JURA ENA 3

SWISS  MADE

The smart choice

If you want the freedom to choose any coffee bean you like the genuine flavour of the bean in your cup the option to adjust the strength of the coffee to suit your taste a product that's environmentally friendly and economical to use (compare the cost per cup with any portion system!) a machine that's not only compact but child's play to operate then look no further. Make ENA, which comes from the Greek meaning number ONE, your first choice!

Selectable coffee strength

Like all JURA bean-to-cup automatics, the ENA also features the patented variable volume brewing unit, which prepares between 5 and 16 grams of coffee under ideal conditions. An advantage you can taste, cup after cup after cup.

Aperture for additional coffee powder

You can also use a second coffee blend in the powder shaft for pre-ground coffee. It is also possible to prepare two cups of pre-ground coffee. To this purpose place two level measuring spoons of pre-ground coffee into the filler funnel. Turn the Rotary Switch to 2 CUPS and press to start coffee preparation.

Height-adjustable coffee spout

The ENA3 features infinite adjustment of the double coffee spout to any height between 65 and 111 mm, meaning it will fit all standard cup sizes. The minimum distance possible between the coffee spout and the edge of the cup guarantees a fine, dense crema and prevents coffee splashes on the machine.

Programming couldn't be easier

Programming the ENA is simple and intuitive. Programming and maintenance buttons are concealed behind an elegant panel. With the Rotary Switch and the interactive display navigating through the programming mode or the automatic cleaning and maintenance programs is a snap.

Ecological intelligence - Zero Energy Switch

This innovative piece of technology, registered for patent by JURA, does not interrupt any process already started. Any coffee being made will be finished before the automatic pre switch-off rinse takes place. Finally, the switch disconnects the machine completely from the mains and the ENA uses no standby energy
